SUMMARY

Engineering leader with nearly 11 years of experience building and scaling products used by tens of thousands of people, from a leading US online sports betting and casino platform to enterprise sales and distribution products serving 80,000+ active users.

I take end-to-end ownership, from requirements and architecture to delivery, release and post-launch support. I grew a team from 2 to 25 engineers, led mobile and backend teams, and drove a full platform migration for DraftKings Casino and Sportsbook. Native Android specialist (Kotlin and Java), also hands-on across Java backend, web full stack and applied AI (LLM summarization and semantic search). Exploring Flutter at a beginner level. I build web and AI features with AI coding tools, directing the architecture and reviewing and testing everything that ships.
